Agile ran project working with a small team of 2 FEWD and 1 BEWD alongside the client based onsite. Continual code review from client's Tech Lead and adopting their best practice and coding guidelines.

FEB 2018 - JULY 2018
We are Friday

Private Healthcare Company

Healthcare app/web solution using Angular, rsJX, ngStore, ES6, Jasmine/Karma for TDD, Ionic, SASS, BEM. Worked as part of a team. Agile project with a team of 3 - 5 developers working on the lead on web project, overseeing code reviews on PR and offering support on the app project. Both projects had a dependency on a common repo with provided components used in both applications. Integrated with a third party API that was been built alongside the web/app project. Used duckrails for mocking APIs whilst API was been built and created tests to help transition the endpoints when we integrated the real API. Involved a lot of close working with the third party creating the API to ensure that data returned met business requirements.

NOV 2017 - JAN 2018
Radical

Lloyds Banking Group

Javascript developer for a portal to create and manage applications. Tech stack includes React, ES6 integrating with a .NET core on the backend via a RESTful API. Introduced to the project webpack, coding standards using airBnB's eslint guidelines, alongside Redux for state management and Jest for TDD. Created a branching strategy using feature branches.
